TÊN SẢN PHẨM: BENT.CH

KÍCH THƯỚC: 1000 X 375 X 500

CHẤT LIỆU: VÁN ÉP

Ý TƯỞNG THIẾT KẾ: BENT.CH là băng ghế được cải tiến dựa trên tinh thần và những hạn chế của kiểu dáng ghế dài truyền thống. Ghế dài BENT.CH có tính thích nghi cao với nhiều điều kiện môi trường riêng biệt, ta đặt BENT.CH ở trường học và công viên, nó đóng vai trò làm ghế nghỉ chân, khi đặt ghế ở thư viện, nó trở thành ghế đọc sách,... Ghế với bề ngang mặt ngồi chỉ 180mm và được bo theo cung tròn 120 độ, mang lại trải nghiệm thú vị khi người dùng có thể ngồi theo cả chiều dọc và ngang của ghế. Bên cạnh đó, giải quyết vấn đề ngồi lâu, thụ động của người dùng.

DESIGN CONCEPT: BENT.CH is an improved bench based on the spirit and limitations of the traditional bench design. BENT.CH is highly adaptable to many unique environmental conditions. We place the BENT.CH in schools and parks, it acts as a resting chair, when placed in the library, it becomes a reading chair,... The chair has a seat width of only 180mm and is rounded in a 120-degree, providing an enjoyable experience when users can sit both vertically and horizontally on the chair. Besides, it solves the problem of users sitting for long periods of time and being passive.

Bent.ch is a combination of the words "Bent" and "Bench," reflecting the idea of a bench with a curved surface. The seat is curved at approximately 120 degrees, creating an aesthetic appeal while promoting an upright sitting posture, allowing users to naturally stretch their legs and avoid passive sitting habits over long periods.

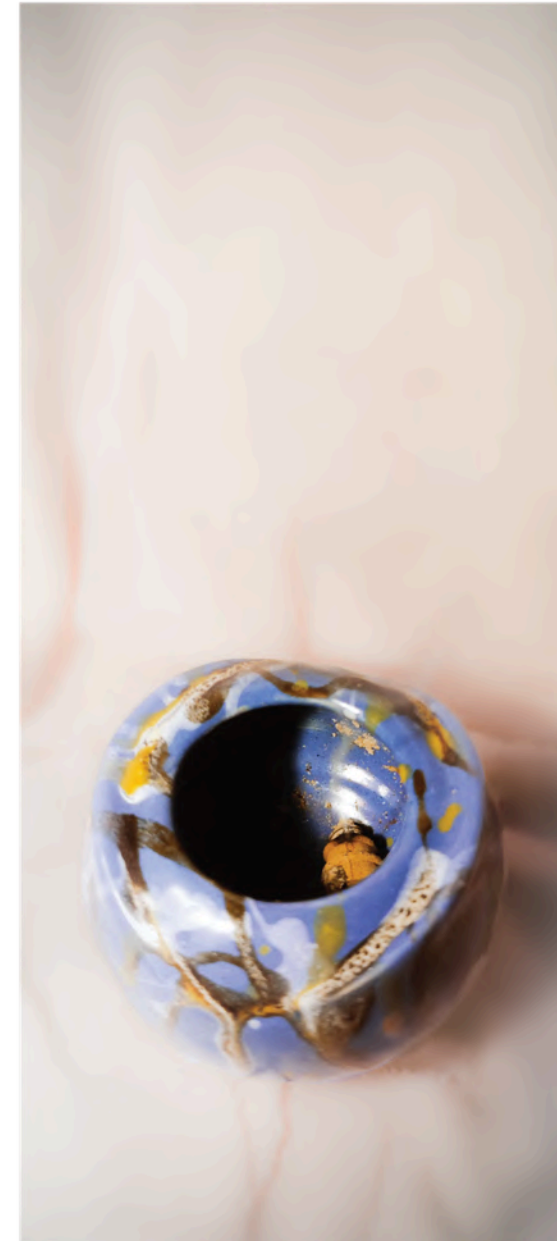

The bench has compact dimensions (0.5 m high, 1 m long, 0.18 m wide). Its slender design saves space while still providing ample seating for multiple people. When in use, body weight is primarily supported by the thighs rather than entirely on the buttocks, creating a more flexible sitting posture. The minimalist design consists of seven parts: the seat and two legs, allowing for easy assembly and disassembly.

Bent.ch can be used flexibly in various settings such as schools, parks, libraries, or on front porches. The design focuses on the need for short breaks, avoiding excessive comfort from prolonged sitting and encouraging alternating use in public spaces.

UOM HOA

DECORATIVE FLOWER POT
DESK, KITCHEN

UOM HOA

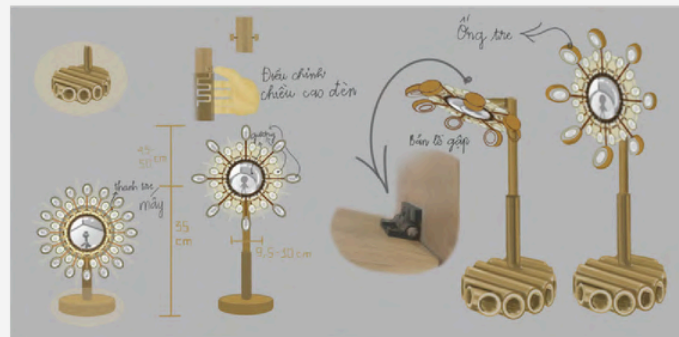

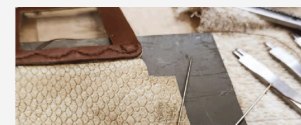

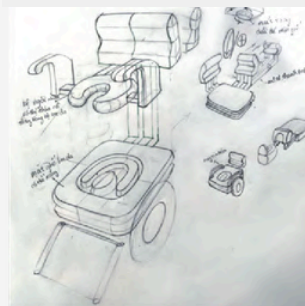

The pot silently nourishes the plant every day. Regarding the operating mechanism of the "flower nursery", the flowers are grown in the best conditions to ensure that customers do not need to water but the plant still lives well by retaining water through the wick. The flower nursery pot is divided into two parts, the water part and the plant growing part (containing the plant and soil).

Other uses: incense holder, cigarette holder and cigarette butt suppressor
